INTRODUCTION

Would You Get Into Your Car on A Rainy Night and Drive to a Gas Station and Wait in Line to Buy a Lottery Ticket, if You Had the Ability to Purchase it on Your Mobile Phone or Computer?

Atlantic West Management Group, Inc. has been a developer of Internet Games since 1999. Originally Incorporated in Antigua, B.W.I., and then relocated to Costa Rica in 2007 as Atlantic West Management S.A., which is now a wholly owned subsidiary of the U.S. corporation, the company has been involved in the business of Virtual Gaming almost since the inception of this exciting industry.

Throughout its history, the company has operated in complete compliance with all laws, in the United States as well as in all of the other jurisdictions in which it operates.

In late 2011, Atlantic West developed an exciting Hybrid Lottery Game that combines the popular Texas Hold'em Poker Game with a Traditional Pick Six Weekly Lottery Drawing.

The Unique Product is protected by U.S. Copyright and Patent Pending status, and offers a unique Lottery Game that is completely legal World-Wide over the internet.

This Report covers the complete operation of this exciting new concept and all features and functionality of the product as well as providing answers to many of the questions that may arise about the feasibility of implementing this International Lottery Internet Based Game.

We encourage the reader to try a “Live Demonstration” of The Game at a company operated website: <http://www.placeyourchipsocaribbean.com>, and also to review the company’s complete product line at: <http://www.atlanticwestsoftware.com>.

LEGAL OPINION:

Judge in New York says poker is not gambling under federal law

Published August 21, 2012

Associated Press

NEW YORK – A federal judge in New York has handed a victory to poker advocates, ruling the card game isn't gambling under federal law because it's primarily a game of skill, not chance.

The decision Tuesday by Judge Jack Weinstein in Brooklyn is likely to be embraced by advocates of card games who are pushing to legalize Internet poker in the United States.

The ruling resulted in the dismissal of a federal criminal indictment against a man convicted last month of conspiring to operate an illegal underground poker club. The judge relied in his decision largely on findings by a defense expert who analyzed Internet poker games.

The judge noted the federal statute was created to combat organized crime.

Product Overview

IT'S FINALLY HERE:

Founded in 1999, Atlantic West Management Group, Inc., (Atlantic West) a 16 year old Software Development Company is pleased to announce an exciting new project designed to support and intensify the Information Technology [IT] industry for Caribbean residents. IT Service and Development is one of the few untapped areas where the Caribbean region can compete with the rest of the world on a level playing field. Atlantic West, a company with its roots on the Island Nation of Antigua & Barbuda, has launched an International Internet Based Lottery Program that brings about World-Wide participation in a brand new Hybrid Lottery Game. The revolutionary game combines Texas Hold'em Poker with a weekly "Pick-6" lottery drawing that creates a special exciting experience for poker players and lottery players alike.

The new game can be viewed and played at: <http://www.placeyourchipsocaribbean.com>, and is currently available in its Final Beta Test Mode for all to try.

HOW IT WORKS:

When the player enters the site, the player has a choice of which one of the 8 countries the player chooses to support. Once registered at the login page for their country of choice, that country where player registered will receive the benefit of player's purchase.

THE GAME CONSISTS OF 2 ELEMENTS:

A. The 1st part is a 6 ½ day per week "Sit N Go" poker tournament where the player can effectively increase their odds as they proceed to the 2nd part of the program, the Pick-6 drawing.

B. Part 2 of the program, the Pick-6 drawing, where players redeem their points for Pick-6 tickets allows for increased chances of winning the weekly Drawing, as points earned in the poker tournament can be redeemed for Pick-6 Tickets.

The Player buys Poker Play Tickets for \$ 1.00 USD each that come with 50,000 play chips. Each ticket can either be redeemed immediately for a single ticket in the weekly Pick-6 lottery game, or optionally be used to enter the weekly poker tournament. The player may continue to play poker as often as they wish until they either lose the 50,000 points, or can continue to play until they have earned enough poker points to convert to multiple Pick-6 Tickets.

Each week's Top Poker Tournament winner will be rewarded with an additional 100 Pick-6 tickets, along with a promotional prize, and the 2nd place winner will be rewarded with an additional 50 Pick-6 tickets.

As players achieve more poker points, they may redeem them for one Pick-6 ticket per 50,000 poker points.

TICKET SALES DISTRIBUTION:

The ticket purchase dollar will be distributed as follows: 40% is applied to the Winner(s) of the Weekly Pick-6 Drawing, 5% is given to the country of the player's registration, and 40% is applied to a College IT Scholarship Fund. Scholarships are awarded to students from the country where player registered and are based on applications presented to that country's Minister of Education. The remaining 15% is retained by Atlantic West to cover the cost of operating the game.

EDUCATIONAL AND CHARITABLE PURPOSE:

This program is specifically designed to elevate the Caribbean Nation's IT (Information Technology) education opportunities, activities and industry exposure. For these reasons, residents of the countries benefitting from the program will not be allowed to purchase tickets. Caribbean residents may play for Free and for Fun with no possibility of winning any prizes.

The Offering

Atlantic West Management Group, Inc. is offering 4 million shares of common stock at \$ 3.00 USD per share, in order to launch a Global Advertising Campaign for its New International Lottery Game similar to the campaigns of "Fan Duel" and "Draft King".

The New Lottery Game is an exciting Poker/Pick Six Weekly Lottery that is available World Wide with ticket purchases and game play available 24/7 on the internet and on all computer and mobile platforms.

The new funding will empower Atlantic West to execute the advertising campaign that is needed in order to gain between one and three percent of the World's Lottery Market estimated to be between 500 - 550 Billion Dollars in 2016.

The following calculation is based on achieving only 1% of annual ticket sales:

World Lottery Sales:	=	550,000,000,000	(estimated)
1% Market Share:	=	5,500,000,000	(tickets sold at: \$ 1.00 each)
Net Profit of 0.12 per ticket	=	660,000,000	
Number of Shares Outstanding	=	76,000,000	(including this offering)
Annual Earnings Per Share	=	\$ 8.68	

Atlantic West Management Group, Inc is a sixteen year old software development company with its Corporate Headquarters and the U.S. 501C3 AWMG Caribbean IT Scholarship Foundation, Inc. division in Hollywood Florida, its programming office and ISP operations in San Jose Costa Rica, and its Lottery Scholarship Operations headquartered in the Island Nation of Antigua and Barbuda BWI

Since the company is mature and operates its own Cloud Hosting Service, there will be no new significant expenses associated with this new product launch, and this will allow the company to start paying quarterly dividends soon after the launch of the Ad Campaign.

In addition, once a 1% market share is achieved, the Company will also be ripe for acquisition or merger. Atlantic West Management Group, Inc. enjoys both Patent and Copyright important protection. Atlantic West Software is unique in that there is currently no other Lottery Product, anywhere, that has the ability to legally sell tickets worldwide over the Internet. There are a few public companies, however, who currently have 100% of the World Lottery Market and may wish to acquire Atlantic West because of its one-of-a-kind proprietary product

assumptions: 76,000,000 shares issued; \$0.12 net profit/ticket; 3 ticket/week=user average; valuation based on 30 times earnings

- The assumption of 76,000,000 total shares issued could be as high as 78,000,000 if the private offering were fully subscribed, and if so, this would dilute all shareholder's value correspondingly.
- The assumption of \$0.12 net profit per ticket should actually increase as volume of ticket sales increase.
- The assumption of 3 tickets per week purchased by the average user is well below the US average of \$10.50/week/player.
- No advertising revenues are incorporated into this pro forma. Those additional revenues might be a significant positive factor.
- The valuation assumption of a 30x earnings multiplier is significantly lower than the 60x-500x+ multiple that is currently typical in the mobile app space.

It is impossible to accurately forecast participation rates or total number of users or average ticket purchase rates as represented here. The projections herein are for illustration purposes only and may represent best case. No assurances can be made that profitability will be obtained, and if obtained, that it will result in sufficient profitability to recoup the Shareholder's entire investment.

These projections are based on the Company's best estimates. There is significant uncertainty as to the actual speed/rate of user growth, the actual number of users, the average weekly user participation rate, and the average weekly participant ticket purchase amounts, among other unknowable variables.

This type of investment is not suitable for all investors. Please refer to the risks as disclosed in the confidential private placement memorandum.

ADDITIONAL INFORMATION

A STRENGTHENING ONLINE AWMG GAMING MARKET & YOUR INVESTMENT

Something to think about. Electronic, online gaming is expanding rapidly. Along with smart phones, tablets, and laptop computers, Internet Gaming is springing to life like never before. The new hardware to support the Apps and the Software being rolled out to millions of lottery and poker players from all over the world.

From ‘Pioneer’ to ‘Opportunity’. This is the legacy of AWMG. This is where we began. But back then we were too early to meet the relatively small and new demand for online gaming not to mention the hardcore industry naysayers denying the phenomenon. Today however, there is a whole new generation of ‘millennia players’ who are rapidly changing this picture and this is now where we will thrive. Back then, the world wasn't ready for us and for this event. No, there was too much old school entrenchment that had to be disrupted. Industry reports now confirm this to be happening more every day.

Our Early Days. When we first began, we saw a giant 'tug-of-war' between the tightly controlled, land based gambling industry and the emerging online gaming markets as they went at each other in unpredictable ways. We hung in though and as we tiptoed forward through the minefield of that competition, we made many modifications, using our resources to our best advantage being ever mindful of our goals. Those markets are now shifting away from the old gambling model of centralized, brick and mortar gaming palaces and are rapidly moving toward full acceptance of internet and online techno-gaming. Many well known land based casinos in the old gaming Mecca's of Las Vegas and Atlantic City are closing their doors in favor of launching their online games to meet this market shift. The internet is the new ‘strip’ for gaming.

On the Cusp. Online gaming is where AWMG has always been. Because we've been visionary and because we understand the technology so well, we have maintained our company throughout the initial struggles for online gaming. We responded and survived during those early trials and we now sit on the cusp of realizing our efforts. And interestingly we do it from exactly the same place where it all began. Yes, we are pushing open a bigger door with a fabulous online lottery concept from The Caribbean island nation of Antigua who is using its influence to bring along, all the other island nations of the region. The name of the new lottery game, PlaceYourChipsCaribbean.com will ultimately include the 15 independent island nations from the Caribbean region as a unified lottery group.

Advertising Revenue Contribution. AWMG is pressing forward to finalize this launch for our client. We know that we will succeed with this launch. We have conquered most every required hurdle to make this project work out financially, politically, legally, contractually and physically. Our presence in Antigua has been met with the greatest Welcome-Back we could hope for. Everything is in place to begin a real ‘cash-flowing’ event for all concerned. You, the future Investor in AWMG will be proud of our accomplishment as well as the financial rewards.

Clearing The Last Hurdle. As soon as we've achieved the minimum Core Group of 30,000 Registered Players needed to operate the game profitably, we will launch the first Lottery, maintaining our profitability, and paying out the weekly cash Lottery prizes as we do so. We need to advertise to spread the word to attract these core players. There is a small cost involved for this to fund an Advertising Budget. We will hire professional advertising partners, whose track records and expertise will be utilized to the fullest. Their proposals combined with some targeted Television Advertising will assure us of the player acquisition success and momentum that we require.

CONCLUSIONS AND IMPORTANT LINKS

- A 16 year old Internet Gaming Program Software Developer.
- A U.S. Corporation with subsidiaries in Costa Rica and Antigua B.W.I.
- Creates and Owns All of its Software Code, and all code is both Copyrighted and Patent Protected.
